

Assessment Schedule – 2022

Physics: Demonstrate understanding of wave systems (91523)

Evidence

Q	Evidence	Achievement	Merit	Excellence
ONE (a)	<p>Third harmonic (or 2nd overtone).</p> 	<ul style="list-style-type: none"> • Third harmonic (or 2nd overtone) <p>AND</p> <ul style="list-style-type: none"> • Node and antinode labelled correctly. 		
(b)	<p>$\lambda = 0.43 \text{ m}$</p> <p>$L = 0.645 \text{ m}$</p> <p>$L = 1.5\lambda$</p> <p>$\lambda = \frac{0.645}{1.5}$</p> <p>$\lambda = 0.43 \text{ m}$</p> <p>$v = f\lambda$</p> <p>$v = \frac{0.645 \times 995}{1.5}$</p> <p>$v = 427.8$</p> <p>$v = 428 \text{ m s}^{-1} \text{ (3sf)}$</p>	<ul style="list-style-type: none"> • Correct wavelength. <p>OR</p> <ul style="list-style-type: none"> • Correct working (incorrect λ). 	<ul style="list-style-type: none"> • Correct answer for speed of sound along the string. 	
(c)	<p>Since the speed of sound along the string increases when Mele tightens the string, and since the length of the string does not change, the wavelength does not change, the frequency of the note will increase:</p> <p>$v = f\lambda$.</p> <p>Mele's original frequency was $995 - 5 = 990 \text{ Hz}$.</p>	<ul style="list-style-type: none"> • f increases. <p>OR</p> <p>990 Hz</p>	<ul style="list-style-type: none"> • v increases, <p>$v = f\lambda$, (L const), OR λ const, f increases.</p> <p>AND</p> <p>990 Hz</p>	

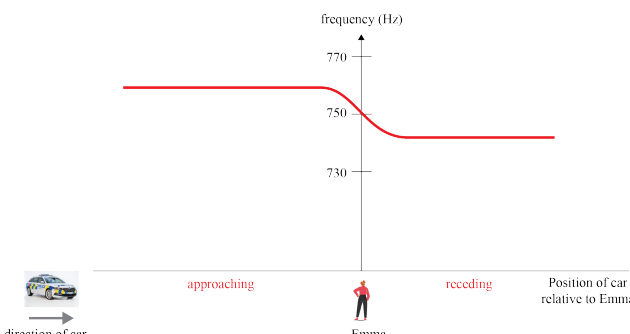

(d)	<p>Higher harmonics are multiples of the 1st harmonic.</p> <p>The flute can be modelled as an open pipe, (as waves reflect at the open end with no phase change) only waves that form antinodes at both ends will form standing waves (with alternating nodes and antinodes). As higher harmonics are all multiples of half wavelengths, all harmonics meet the end conditions and are able to form and fit the length of the flute.</p> <p>Since the clarinet has one end closed, it can be modelled as a closed pipe, (as waves reflect at the fixed end with a 180-degree phase change) only waves that result in nodes at the closed end and antinodes at the open end will only form standing waves (with alternating nodes and antinodes). Hence only odd multiples of $\frac{1}{4}$ wavelengths can be formed that fit the length of the clarinet.</p>	<p>Either a diagram or a statement.</p> <ul style="list-style-type: none"> Closed pipe end condition (A-N) open pipe end condition (A-A) <p>OR</p> <p>To show odd multiples of $\frac{1}{4}$ wavelengths formed on the clarinet.</p> <p>OR</p> <p>Multiples of half wavelengths on the flute.</p> <p>Note</p> <p>“Can only form odd harmonics” is NOT sufficient.</p>	<ul style="list-style-type: none"> Explanation of why 2nd harmonic in closed pipe (clarinet) cannot form <p>OR</p> <p>Explanation of why 2nd harmonic in open pipe (flute) can form.</p>	<ul style="list-style-type: none"> Explanation of why 2nd harmonic in closed pipe (clarinet) cannot form. <p>AND</p> <ul style="list-style-type: none"> Explanation of why 2nd harmonic in open pipe (flute) can form.

------------	--	--	---	--

Alternate method 2

d and n are the same

$$n\lambda = d \sin \theta$$

$$\lambda = \frac{d \sin \theta}{n}$$

$$\lambda_{\text{red}} - \lambda_{\text{violet}} = 2.54 \times 10^{-7}$$

$$\frac{d \sin 50.82}{n} - \frac{d \sin 28.05}{n} = 2.54 \times 10^{-7}$$

$$\frac{d}{n} (\sin 50.82 - \sin 28.05) = 2.54 \times 10^{-7}$$

$$\frac{d}{n} = 8.33 \times 10^{-7}$$

$$\lambda_{\text{red}} = \frac{d \sin \theta}{n}$$

$$\lambda_{\text{red}} = 8.33 \times 10^{-7} (\sin 50.82)$$

$$\lambda_{\text{red}} = 646.71 \text{ nm}$$
